

Opvantek Inc. Organization Expands / Changes

NEWTOWN, PA – December 1, 2009 - Opvantek, Inc. is pleased to announce a recent expansion of its software development and customer support team, based on continuing strong demand for the Optimain® product suite and associated services. In addition to several new staff members, Lauren Bowker has been promoted to the position of Quality Assurance & Support Manager. Lauren will have direct responsibility for ensuring the quality of all Opvantek software deliveries, and for managing all customer support activities.

“We’re very proud and excited to bring Lauren into a full-time customer-facing role in our growing organization.” says Andy Benedict, President and co-founder of Opvantek. “We are certain that her in-depth product knowledge, attention to detail, and enthusiasm will continue to ensure that our customers are very satisfied with their Opvantek solutions.”

Bowker has worked for Opvantek for the past five years, filling a wide variety of critical back-office roles including software testing and documentation, and as office manager. As a result, she has unique knowledge of our products, customers, staff, and business processes, positioning her for immediate success in her new role. Our recent staff expansion included additional resources to assume all administrative activities, allowing Lauren to focus full-time on quality assurance and customer support.

According to Tony Sileo, Optimain Product Manager at Opvantek, “Filling this important position in our organization is critical so that we can maintain our base of highly satisfied customers, while we continue to deliver Distribution Integrity Management solutions to the industry. Satisfied customers are the best advertisements we can have.”
